W. McLennan, Esq.,
Thursday Island, Q.

Dear Sir,

Cayley's "Birds of Australia".

[illegible]pose to issue an [illegible]ted prospectus shewing:

The Manner in which each bird will be described;
One of the 250 coloured plates of Birds;
One of the 64 coloured plates of Eggs;
Photographs of Nests in situ, with bird at nest if possible.

The Editors have selected the Bush Chats for the purpose of the prospectus (R.A.O.U. Nos. 489 Ephthianura albifrons, 490 E. tricolor, 491 E. aurifrons, 492 E. crocea, 493 Ashbyia lovensis). Will you kindly let us have at your earliest convenience your field observations of these birds, written on the forms sent to [illegible]ly, together with any photographs [illegible] have of their [illegible]ng, etc.

No effort is being spared to make this work the last word in Australian Ornithology, and since we wrote to you previously we have arranged with Mr. A. J. Campbell to write the Oological section. Mr. H. L. White, of Belltrees, has kindly made available the whole of his collection of Australian Birds' Eggs, containing over 800 species, every one of which will be reproduced full size in natural colours, and fully described.

Mr. Cayley would be glad to receive the information now asked for, in order that the prospectus may be completed as soon as possible.

Yours faithfully,

ANGUS & ROBERTSON, LTD.

W. McLennan, Esq.,
Thursday Is.,
Q.

Dear Sir,

The material for the first twelve parts of "Cayley's Birds of [illegible]" is now being got together, and we enclose herewith a [illegible]t of the work. The species at present [illegible]y the editors are those numbered 1 to 197 in the [illegible]heck List, and the co-operation of the leadi[illegible] Commonwealth is being sought in the hope that [illegible]iginal field notes on the birds with which [illegible]

[illegible]ll, of course, be made of all photographs [illegible]r publication. Payment will also be [illegible] accepted matter, the amount of the pa[illegible] [illegible]ou by the editors before publication. [illegible]iven a good deal of time to observation [illegible] of your co-operation in the great work we [illegible]ken.

Under separate cover we have posted you some field note forms. If you would like more we shall send them by return mail on hearing from you, and we shall also send you some ruled sheets of same size if the spaces on the forms are not large enough for recording your [illegible]servations. May we ask that all notes which you send in be [illegible]itten in ink and signed for identification?

As you will see by the enclosed "Preliminary Announcement", the book will be fully illustrated, and we purpose sending you some specimen plates of the birds and eggs in the course of a few weeks.

Yours faithfully,

ANGUS & ROBERTSON, LTD.

Mr. W. McLennan,
COEN, N.Q.

Dear Mr. McLennan,

We have practically completed the matter for the first 12 parts of the book, and Mr. Campbell has described numbers of specimens collected by you, especially amongst the pigeons, quails, and rails, ~~and~~ So I'm anxious to get your field notes on these birds. Would you mind letting me have your Notes on the first 100 species on the 1913 R.A.O.U. List as soon as possible. Have you taken any new photos lately? I hope so, as I can do with some of the pigeons, quails and rails.

Have just returned from the Adelaide R.A.O.U. Congress where I met Dr. MacGillivray. He wishes to be kindly remembered to you.

Trusting you are well, and the trip a successful one.

Hoping to hear from you shortly.

Kindest regards.

Yours sincerely,

Neville Cayley

1st October, 1923.

CAYLEY'S BIRDS OF AUSTRALIA.

REVISED LIST SHOWING PHOTOGRAPHS STILL REQUIRED.

This final appeal for photographs of the first 110 birds on the R.A.O.U. Check List (1913 edition) is made in the hope that Bird Photographers will be able to fill up the gaps by the end of this year, as the first part of "Cayley's Birds" will definitely appear in February 1924, and will be followed by a new part every month until the work is completed. Each subject of which a photograph has already been secured is indicated by an X under its heading on the attached list; those without an X are still wanted - especially birds before the names of which an asterisk (*) appears.

Opportunities to take photographs of birds numbered after 110 will probably occur while the earlier numbers are being sought, and we shall be glad to have as many as possible of the gaps in the later part of the list filled up during the 1923 and 1924 nesting seasons.

Field Observations.

Field observations, written on forms (sample attached) which we can supply in any quantity, are also solicited. Correspondence and suggestions are invited, and will receive prompt attention.

PAYMENT FOR PHOTOGRAPHS AND FIELD OBSERVATIONS.

With all photographs and field observations published in Cayley's Birds of Australia the contributor's name will be printed, and where required a fee will be paid for the right of publication.

CAYLEY'S BIRDS OF AUSTRALIA.

CAYLEY'S BIRDS OF AUSTRALIA
THEIR HABITS, NESTS, AND EGGS
A SYSTEM OF AUSTRALIAN ORNITHOLOGY

FIELD OBSERVATIONS AND PHOTOGRAPHS
contributed by upwards of 80 Australian Ornithologists and Photographers

General Editor: CHARLES L. BARRETT, C.M.Z.S.

Scientific Descriptions of Birds, Nests, Eggs, and Distribution by
A. J. CAMPBELL, C.M.B.O.U., F.A.O.U.

Coloured plates by NEVILLE W. CAYLEY.

To be published in parts by ANGUS & ROBERTSON, LTD., Sydney

The nomenclature adopted by the R.A.O.U. ("Official Check List of the Birds of Australia") will be followed, including any changes that may be made by the present Check List Committee prior to the publication of the part dealing with the species concerned.

NOTE.—If the spaces on this form are insufficient for recording your observations, the Publishers will send you a supply of plain sheets post-free on application.

FORM FOR RECORDING FIELD NOTES
(Numbers as per R.A.O.U. Check List 1913)

No..... Name.....

NOTE.—All replies to the following questions to be based solely on personal observation. When this form has been filled in, it should be posted to Mr. NEVILLE W. CAYLEY, C/o Angus & Robertson, Ltd., 89 Castlereagh Street, Sydney, N.S.W.

1. Vernacular or popular names, stating localities where used:—

2. Notes on habits, etc.; type of country favoured; and whether rare or abundant:—

3. Changes of plumage, if any, from young to adult stage, and the period occupied in such changes:—

4. Duration of Nesting Season:—

5. Situation in which nest is usually found (stating botanical and popular names of tree or shrub used as site) : give details of any abnormal site:—

6. Size and shape of nest; materials of which constructed; and whether both sexes share in work of building:—

7. Number of eggs in clutch; particulars of abnormal clutches:—

8. Variations in size and colour of eggs:—

9. If migratory, dates of arrival in and departure from district:—

10. Economic Notes: usual food, etc.:—
